

## MIDNIGHT BUTTERFLY

I come and go with a mind of my own  
Midnight Butterfly  
Like the flow of love you can't control  
Midnight Butterfly

Flutter by Midnight Butterfly

I break the rules, and take no fools  
Midnight Butterfly  
Just play it cool or your heart will be my next jewel  
Midnight Butterfly

Flutter by Midnight Butterfly  
Flutter by Midnight Butterfly  
And everyone loves to see how fragile I can be

Soul to soul, that's how I roam  
Midnight Butterfly  
Like the wind, everywhere is my home  
Midnight Butterfly

Flutter by Midnight Butterfly

Flutter by Midnight Butterfly  
Everyone loves to see how fragile I can be

## LET'S NOT CALL IT LOVE

Burn me like wood  
Burn me up  
Burn me hot and good  
But let's not call it love

*(Chorus)*

Call it passion or bliss  
Call it crush or wish  
Call it rapture or luck  
But let's not call it  
Let's not call it love

Kiss me like your first  
Kiss me like the one and only  
Kiss me like your last thirst  
But let's not call it love  
Let's not call it love

*(Chorus, repeat refrain 3x)*

*(Spoken)*

From the deepest dark where I dreamed you might be  
Eclipsed for a year or eternity  
Comes the perfect harmony  
Traacherous but sweet

Take me in your arms  
Take me tenderly  
Take me with your charms  
Take me, take me, take me

I wonder if you'll get me  
I wonder if you would  
I wonder if you'll catch me  
I wonder if you could

*(Chorus, repeat refrain 3x)*

*(Spoken)*

Now angels flock like hungry sheep  
Sacrificing their lofty sleep  
And strangers stop to listen for words we cannot speak  
Even rhymes and all of time fall at my feet  
Scent and sound of holiness – all that remains

*(Outro)*

## MOMENT/MEMORY

A moment...  
A sip of wine...  
Memory floods  
into my mind

Like a wave so high  
it could drown daylight  
Like a wind so wild  
it could tear down night

Like a breath of air  
so cold, it burns  
Like word so long  
it can never be learned

Like a deep root that reaches  
right through the dirt  
and grows a tree  
on the other side of earth

A moment...  
A sip of wine...  
My soul bathes  
in blue divine

Like a pool so deep  
you can dive forever  
Like a promise you keep  
in a nightingale's feather

Like a fire so strong  
it could vaporize the ocean  
Like a perfect song  
can harmonize emotion

Like the unexpected swerve  
of a wished-upon star  
curves a little closer  
and you open the jar

La la la  
La la de da (x4)

A little closer...  
A wished-upon star

## STARS CROSS

Wish upon a falling star  
Wonder where you are  
I could wish my life away  
But I won't go that far

*(Chorus)*

Stars cross  
Love is lost  
All the angels cry  
My wings shake  
Soul aches  
I'm going to fly  
And I won't try anymore your heart to take

Once we brought the sun to shame  
Burning, spark to flame  
Wonder why the heavens turned  
Our love eclipsed in vain

*(Chorus)*

Stars cross  
Love is lost  
All the angels cry  
My wings shake  
Soul aches  
I'm going to fly  
And I won't try anymore  
No I won't break

Wish I may, wish I might  
rearrange the night  
and orchestrate celestial fate  
Beneath the moon's shimmering light

*(Chorus)*

Stars cross  
Love is lost  
All the angels sigh  
My wings shake  
Soul aches  
I'm going to fly  
And I won't cry anymore  
No I won't break

## FREE MY HEART

I.... I have waited  
Many moons, anticipated  
a love like thunder to set my heart free  
I'm under cover, in the dark with my dreams

I... can't wait one day longer  
I can't make the aching much stronger  
Tell me: Who cast this spell? Who holds the key?  
Who is the taker, the breaker, the one who can set my heart free?

*(Chorus x2)*  
Free my heart  
Please set me free  
Free my heart  
Fly with me

*(Instrumental)*

So much sorrow even the sun turns blue  
Come tomorrow, my words might cut through  
But if they don't, maybe I won't last a day  
And then I'll borrow one more nightsong to say:

*(Chorus)*  
Free my heart  
Fly with me  
Free my heart....

## HEAVEN IN MY VIEW

Winds blow, I'm in the throes of passion  
Dancing about with no direction  
Romancing a dream, perhaps it's true  
Cursed and blessed with heaven in my view

*(Chorus)*

I'll be flying through the night  
Tempting dreams to come to life  
And I won't miss one chance to feel  
Heaven coming over me  
No turning around  
If I break the case and make the chase....

The moon burns hotter than the day could shine  
Rising so fast, so wild and right  
Each star, one more yearning spark  
in a twilight sky, igniting my heart

*(Chorus)*

I'll be flying through the night  
Tempting dreams to come to life  
And I won't miss a chance to feel  
Heaven coming over me  
No turning around  
If I break the case and make the chase right now

Evening calls, everything falls away  
My soul cries, but wings are in its place  
A whisper, I shiver to the bone  
You're not here, but I'm not alone

*(Chorus)*

I'll be dancing with the moon  
Tempting dreams to all come true  
And I won't miss a chance to feel  
how the night can set me free  
No turning back now  
When I break the case and make the chase right now

I'll be dancing with the moon  
Tempting dreams to all come true  
Blessed with heaven in my view (x3)

## BUTTERFLIES DON'T BLEED / HEARTBREAKER

Heaven calls but all I see  
is steady rain tonight  
It fills my eyes where a tear might be –  
If only I could cry

So if you've come with thoughts to keep  
My soul, it has no deed  
I'm a Heartbreaker, heartbreaker, Heartbreaker, Heed:  
Butterflies, butterflies, Butterflies don't bleed

Half a moon, I've got half a mind  
to split in two – or three  
One for you, one for the wind I ride  
One for my destiny

So if you've come my fate to seal  
it's much too late to plead  
I'm a Heartbreaker, heartbreaker, Heartbreaker, Heed:  
Butterflies, butterflies, Butterflies don't bleed

*(Bridge)*

*(Instrumental)*

Leaves scatter like shattered glass  
and summer ends like this  
My aching falls to the frosted grass  
as I taste one last kiss

So if you've come to take me home  
there's one thing you should know:  
I'm a Heartbreaker, heartbreaker, Heartbreaker, Heed:  
Butterflies, butterflies, Butterflies don't bleed

*(Bridge x2)*

*(Instrumental w/ Chorus)*

Don't think about me, don't think about this song  
Don't listen, don't feel, don't even remember me when I'm gone  
Don't make a promise, don't do it for keeps  
Don't analyze me, don't move, don't reach  
Don't rescue your notion of dignity  
Don't conjure one emotion for me  
Don't cry me a river, those tears won't mean a thing....

*(Outro)*

## IN BETWEEN BLUE MOONS

In between blue moons, I rise and fall  
with frost then fever, then, it seems, nothing at all  
In between, I bask in memories and dreams  
disregard that you're not here with me

*(Chorus)*

In between blue moons  
In between blue moons  
In between blue moons

In between blue moons, I think so much  
Sun burns hot and turns me into dust  
I spill into an ocean of love untamed  
It bends, I blend, the potion fills my veins

*(Chorus)*

*(Bridge)*

I wait until the next blue moon with you  
I wonder if it never comes  
can I withstand the news  
I ache in expectation like a bruise  
I hunger so, I go outside  
to check the sky for clues

*(Instrumental)*

In between blue moons, rhymes come and go  
moving in a rhythm all their own  
In between, the chords call out your name  
forged in staves upon the milky way

*(Chorus/Vamp)*

## THREE DAYZ IN HEAVEN

I shiver in the midnight heat  
Quiver from my heart's beat  
Flutter as the moon sings  
Something's taken over me, and wings are on my feet

Is it spirit, or vampire?  
Illness, or profound desire?  
Water cannot cool me, yet I freeze  
Wizards cannot fool me, yet I'm spellbound in the breeze

*(Chorus)*

Three days  
Can't get my feet to the ground  
Three days  
'til I can feel anything at all  
Three days  
I float  
Three days  
I fly  
Three days  
in heaven  
and you're the reason why

As I vow to never come back down  
Drifting on soul, I bump into a cloud  
With gems in my mind, and glitter in my hair  
Magic spills from me everywhere

*(Instrumental)*

*(Chorus)*

When I touch earth, questions begin  
Love or lust? Blessing or sin?  
All I want is for two to be one  
For heaven to fall and live under the sun

*(Chorus)*

## QNA:PNP

*Spoken:*

*Staring into space, entranced and filled with grace  
I dance upon some notes – they fall like snow, in a flurry  
I feel warm but a chill runs up and down my spine  
daring me to believe in love we lost, once upon a hurry*

Questions on your mind  
Ties we fail to bind  
Bet and lost it all  
and we find our bridge on fire  
Well, we've all been burned  
by those yet to learn  
Best to judge all souls  
by the love they give and earn

Do you hear the wind?  
Feel the rain on your skin  
A world weeps in fear  
Let love begin

*(Chorus)*

Ah, Love's a mystery  
Ah, But it's plain to see  
Ah, Love's a mystery  
Ah, Coming up in me

When our future seems to be  
a card up someone's sleeve  
Baby, don't you know  
It's up to you and me  
Do you hear the wind  
high above the din?  
Jump into this song  
Let love-light in

*(Chorus)*

What you keep but to hide  
weaves a storm so wild  
Like wars and tyranny  
that steal the people blind  
Nothing left to lose  
Some things we can't choose  
But if we tell the truth  
We justify these blues

*(Chorus / Ad lib / Outro)*
